Full-Stack AI & Software Engineer | Park Scholar at NC State University

EDUCATION

North Carolina State University, Raleigh, NC

- B.S. in Computer Science, Business Administration, Expected May 2028
- Park Scholar | Honors University Program

EXPERIENCE

Lenovo, Raleigh, NC — Global Social Media Analytics & AI Integration Intern *(May 2026 - Present)*

- **AI Product & Automation Development:** Built and prototyped internal AI tools for Lenovo global social teams, translating manual marketing workflows into usable applications for content intelligence, compliance, reporting, and campaign operations.
- **FIFA World Cup Social Intelligence:** Developed the FIFA Social Content Generator & Intelligence System, combining AI-assisted ideation, content verification, performance insights, and social dashboards to support Lenovo's FIFA World Cup marketing initiatives.
- **Paid Media Budget Pacing:** Engineered a budget pacing dashboard that consolidates campaign budget and spend data, flags over/under-pacing, and supports live-refresh workflows
- **Compliance & Governance Automation:** Created an AI-powered social compliance workflow that evaluates account data, critical issues, and streamlines review across brand, licensing, ToV, and governance requirements.

Flavur AI Inc., Raleigh, NC — AI Engineering & Product Management *(June 2025 - Present)*

In the summer of 2025, built and launched an AI cooking assistant, using a modern development framework

- **AI Application Development:** Led the end-to-end development and deployment of a Generative AI cooking assistant, integrating LLMs with a React Native frontend to deliver real-time, AI-driven user experiences.
- **End-to-End Product Engineering:** Implemented the full-stack development and launch of a consumer-facing mobile application using React Native and Expo, managing features from initial architecture through deployment, and successfully bridging cross-platform code for iOS and Android release.
- **Mobile UI & AI Experience:** Translated complex backend capabilities into intuitive, visually driven interfaces. Using OpenAI API, Supabase, and Modal, created a LLM-powered AI solution.
- **Infrastructure & Data Flow:** Built robust data flow pipelines and implemented reactive state management for high-performance frontend responsiveness. Accelerated the development lifecycle by utilizing AI coding agents to write, debug, and iterate on complex backend and frontend code bases.

Office of Information Technology WIC, Raleigh, NC — Lead IT Technician *(August 2025 - Present)*

The Office of Information Technology, NC State's central IT department, provides nimble, effective, efficient and collaborative IT services, solutions and strategies in a timely and helpful manner that assist the university, state and nation in achieving their strategic goals.

- **Technical Problem Solving Skills:** Diagnosed and resolved a wide array of complex hardware, software, malware, and network issues across diverse devices (Mac OS, iOS, Android, Windows OS Boot System, etc.), delivering efficient technical and customer support to the university community.

Aadee Inc., Charlotte, NC — Founder *(June 2021 - June 2024)*

While in high school, started helping local businesses with digital technologies during COVID, setting up online stores, digital and social media marketing, and personalized apps.

- **AI/ML:** Designed and deployed AI-powered chatbots and multi-agent business tools to automate social media, scheduling, customer service, issue detection, and data analytics for enterprise clients.
- **Mobile App Development:** Directed full-lifecycle development of iOS, Android, and web applications utilizing React, Python, and cloud platforms (AWS, Vercel, Modal, etc.), achieving over 100,000 downloads.
- **Cross-Functional Collaboration:** Partnered closely with the client's customer support teams to deliver PoC's and product features from inception through design feedback, implementation, and launch, ensuring the mobile experience aligned with rapid user adoption goals.
- **Customer & Market Insights:** Managed end-to-end technical solutions for small businesses, implementing e-commerce platforms and CRM integrations to optimize customer engagement and revenue.

KM Accounting & Tax Services, NC — Certified QuickBooks Accountant *(Jan 2018 - May 2024)*

- **Financial Management Software:** Managed comprehensive financial records, reconciliations, and tax documentation for multiple clients utilizing Intuit QuickBooks, TaxAct, and Drake software.
- **Customer Acquisition:** Mastered skills in Microsoft Office and sales + meetings with potential and current clients while developing client relationships
- **Ownership & Initiative:** Spearheaded the digital transformation of accounting workflows by implementing cloud-based solutions and actively drove new business development through client onboarding

---

PROJECTS & RESEARCH

- **Pathway -** A personalized AI student success platform with academic predictions and interactive AI tutor
- **FlavurAI -** A personalized AI agent application for cooks, chefs, and people who just like food
- **GoldenXI -** A World Cup prediction app with brackets, private groups, leaderboard, and interactive AI games
- **ERICA AI -** An AI-powered app that helps bridge the student learning cycle with teachers
- **AI Receptionist -** An AI Receptionist that can assist with calls and scheduling for businesses
- **AI Chatbot -** An AI Chatbot that can assist in your daily business or personal scheduling
- **PackBalance -** A user-friendly budgeting app for students at NCSU
- **Grade Simulator App** – Predicts students' final grades using machine learning algorithms.
- **AI Skin Cancer Detection** – Developed a CNN-based AI model for early diagnosis of skin cancer.

SKILLS

- **Programming Languages:** Java, Python, React, JavaScript, TypeScript, C#, SQL, HTML/CSS
- **Mobile & Frontend:** Vercel, iOS SDK, Android SDK, Responsive UI/UX Implementation
- **AI & Machine Learning:** PyTorch, Supabase, Google TensorFlow, Node.js, RESTful APIs, LLMs
- **Cloud Computing:** Modal, AWS, Google Cloud, Microsoft Azure
- **Software & Tools:** Android Studio, Git, VS Code, Unity, Linux, Bash, Power BI, CI/CD Pipelines
- **Business:** Great understanding of business, sales, and accounting. Excellent communication skills
